

SUHAMA MUSTAFA

Full Stack Developer | AI-Driven Development

suhamamustafa1@gmail.com | +92 344 1272583 | Rawalpindi, Pakistan

[linkedin.com/in/suhama-mustafa-b58a152a5](https://www.linkedin.com/in/suhama-mustafa-b58a152a5) | github.com/suhama101 | portfolio-rust-beta-40.vercel.app

PROFESSIONAL SUMMARY

Full Stack Developer with production experience building AI-powered web applications for live government clients. Proficient in Next.js, React, Node.js, and LLM integration, with end-to-end ownership of SaaS and ML projects from design to deployment. Hackathon participant with experience applying AI solutions under real-world constraints. Currently pursuing MS Software Engineering at NUST while contributing to client projects at Inotech Solutions.

WORK EXPERIENCE

Software Engineer | Inotech Solutions | Rawalpindi, Pakistan

September 2025 – May 2026

- Built and delivered a full-stack prototype to government client ISSB using Next.js, Node.js, and Aiven Cloud (MySQL), independently contributing to 80%+ of the application alongside senior engineers.
- Developed and deployed 3+ live modules on PAGB (pagb.org.pk), a live government production platform, collaborating in an Agile team via Git workflows and code reviews.
- Designed and built an HTML5/CSS/JavaScript dashboard prototype for FPCDL submitted to client stakeholders for design approval.
- Developed responsive UI/UX components and integrated REST APIs across multiple client projects, improving reusability and reducing frontend delivery time.
- Independently built the Hardware and Software sections of the Inotech company website using HTML, CSS, and JavaScript.

Freelance UI/UX & Frontend Designer | Remote | Pakistan

March 2025 – July 2025

- Designed branded social media content for Vriopi, strengthening online visual identity and engagement.
- Created interactive, age-appropriate digital templates for Cedar School (Dubai) to improve classroom engagement.

EDUCATION

MS Software Engineering | NUST Military College of Signals, Rawalpindi

September 2025 – Present | CGPA: 3.37 / 4.0

Relevant Coursework: Data Mining, Computer Vision, Cloud Computing, Advanced Software Engineering, Software Quality Engineering, Software System Design & Architecture, Research Methodology, Software Project Management, Software Requirements Engineering.

BS Information Technology | University of Sargodha

2021 – 2025 | CGPA: 3.1 / 4.0

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Python, REST APIs, JWT Authentication

Databases: Supabase (PostgreSQL), MySQL, Aiven Cloud

AI / ML: LLM Integration (Gemini, Groq), Prompt Engineering, Model Fine-tuning, NLP, Machine Learning, Streamlit, n8n AI Workflows

Tools: Git, GitHub, Vercel, Railway, Figma, Canva, GitHub Copilot, Windsurf, n8n

KEY PROJECTS — PROFESSIONAL

ISSB Website — Government Client | Next.js, Node.js, Aiven Cloud (MySQL)

issb-sand.vercel.app | issb.gov.pk

- Delivered a fully functional, production-ready application to Inter Services Selection Board (ISSB) Pakistan — contributing to 80% of the full-stack build including REST APIs, dynamic UI, and database schema design.

- Built secure, government-grade features: dynamic schedule management, gallery, candidate portal, and contact modules. Application approved by client.
- Currently in final production hosting configuration — staging deployment live at issb-sand.vercel.app. Full deployment to issb.gov.pk will go live upon hosting and IP configuration completion.

PAGB Website — Pakistan Army Green Book | Next.js, Node.js, REST APIs

pagb.org.pk

- Designed and deployed a fully responsive, production-grade UI/UX for pagb.org.pk — a live government platform for Pakistan Army academic and military research publications.
- Developed and deployed 3+ functional modules in an Agile team; platform is live and publicly accessible.

FPCDL Dashboard — Government Client | HTML5, CSS3, JavaScript

fpdc-eight.vercel.app

- Designed and built a comprehensive dashboard prototype for FPCDL incorporating branding, organizational imagery, and role-specific UI flows tailored to government administrative workflows.

Inotech Solutions Website | HTML, CSS, JavaScript

inotech.vercel.app/hardware/hardware.html

- Independently designed and developed the Hardware and Software sections of the Inotech company website, improving frontend structure, navigation, and sector-based filtering UI.

INDEPENDENT PROJECTS

SmartHire AI — AI-Powered Hiring Platform (SaaS)

smarthire-ai-lrq8.vercel.app

- Built an end-to-end AI hiring platform with resume parsing, Gemini LLM integration, JWT authentication, and candidate fit scoring — demonstrating full SaaS product ownership from design to deployment.
- Engineered structured prompt pipelines for JSON extraction from unstructured PDF text; integrated batch candidate ranking and job description matching for recruiters.

AI Data Dashboard | Python, Streamlit, Machine Learning

fullstackai-datadashboard.streamlit.app

- Built an ML-powered analytics dashboard with live data visualization and integrated ML-based insights; deployed live on Streamlit Cloud.

AI / Machine Learning Projects

- Image Classification: Fine-tuned a deep learning model for multi-class image classification using transfer learning, improving prediction accuracy across test sets.
- News Classification (n8n Workflow): Built an automated news categorization pipeline integrating AI models into an n8n workflow for real-time processing.
- AI Model POCs & Testing: Conducted structured experiments on LLM and ML models; produced performance benchmarking reports comparing model outputs.

RESEARCH & PUBLICATIONS

Improving Floyd's Algorithm for Efficient Cycle Detection

Mehran University Research Journal of Engineering & Technology — Under Review

- Analyzed effect of list size, cycle length, and start position on Floyd's algorithm; developed a predictive model to estimate detection steps with applications in graph theory and real-time systems.
- Authors: Suham Mustafa, Hikmat Ullah Khan, Irshad Ali, Hadia Abu Bakar, Anam Naz.

Food Distribution Application — Research Paper

Springer Journal — In Progress | MCS, NUST

- Co-developing a mobile-first food redistribution platform with real-time geolocation matching and ARIMA-based surplus forecasting; achieved lowest error (MAE: 4.1, MAPE: 5.8%) vs. SARIMA, Prophet, and LSTM.
- Authors: Suham Mustafa, Aamir Yousaf, Muhammad Ali, Dr. Nazia Bibi, Shafa-at Ali Sheikh.

ACHIEVEMENTS & EXTRACURRICULAR

Evorozen Innovators Hackathon | Online | June 2026

evorozen-innovators-hackathon.devpost.com

- Participated in the Evorozen Innovators Hackathon — an online competitive event focused on building innovative AI and software solutions under time constraints.

AI Hackathon | NUST Military College of Signals | February 2026

- Participated in an AI Hackathon organised by NUST MCS — built and presented an AI-powered solution under time constraints, collaborating with a team to prototype and demo a working product.

DSA Problem Solving | LeetCode

leetcode.com/u/suham

- Actively solving Data Structures and Algorithms problems on LeetCode — strengthening problem-solving and computational thinking skills.
